

# Energy performance certificate (EPC)

8 Newby Drive LIVERPOOL L36 2QT	Energy rating	Valid until:	19 March 2034
	<b>C</b>	Certificate number:	5600-8113-0522-7390-3743

**Property type** Mid-terrace house

**Total floor area** 90 square metres

## Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

## Energy rating and score

This property's energy rating is C. It has the potential to be B.

[See how to improve this property's energy efficiency.](#)

The graph shows this property's current and potential energy rating.

**Properties get a rating from A (best) to G (worst) and a score.** The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

## Breakdown of property's energy performance

### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Cavity wall, filled cavity	Average
Roof	Pitched, 250 mm loft insulation	Good
Window	Fully double glazed	Average
Main heating	Boiler and radiators, mains gas	Good

Feature	Description	Rating
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system, no cylinder thermostat	Average
Lighting	Low energy lighting in 60% of fixed outlets	Good
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	None	N/A

## Primary energy use

The primary energy use for this property per year is 207 kilowatt hours per square metre (kWh/m<sup>2</sup>).

► [About primary energy use](#)

## How this affects your energy bills

An average household would need to spend **£1,347 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £314 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2024** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

## Heating this property

Estimated energy needed in this property is:

- 7,076 kWh per year for heating
- 4,054 kWh per year for hot water

## Impact on the environment

This property's environmental impact rating is D. It has the potential to be B.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO<sub>2</sub>) they produce each year.

## Carbon emissions

**An average household produces**

**6 tonnes of CO<sub>2</sub>**

---

<b>This property produces</b>	<b>3.3 tonnes of CO2</b>
-------------------------------	--------------------------

---

<b>This property's potential production</b>	<b>1.5 tonnes of CO2</b>
---	--------------------------

---

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

# Steps you could take to save energy

▶ [Do I need to follow these steps in order?](#)

## Step 1: Floor insulation (solid floor)

Typical installation cost £4,000 - £6,000

Typical yearly saving £53

Potential rating after completing step 1

70 C

## Step 2: Hot water cylinder insulation

Increase hot water cylinder insulation

Typical installation cost £15 - £30

Typical yearly saving £49

Potential rating after completing steps 1 and 2

71 C

## Step 3: Low energy lighting

Typical installation cost £20

Typical yearly saving £42

Potential rating after completing steps 1 to 3

72 C

## Step 4: Hot water cylinder thermostat

Typical installation cost £200 - £400

Typical yearly saving £86

---

## Potential rating after completing steps 1 to 4

**74 C**

---

## Step 5: Solar water heating

---

Typical installation cost

£4,000 - £6,000

---

Typical yearly saving

£85

---

## Potential rating after completing steps 1 to 5

**76 C**

---

## Step 6: Solar photovoltaic panels, 2.5 kWp

---

Typical installation cost

£3,500 - £5,500

---

Typical yearly saving

£551

---

## Potential rating after completing steps 1 to 6

**86 B**

---

## Who to contact about this certificate

### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

---

**Assessor's name**

Michael Connell

---

<b>Telephone</b>	07730 798481
------------------	--------------

---

<b>Email</b>	<a href="mailto:info@greendealenergysolution.co.uk">info@greendealenergysolution.co.uk</a>
--------------	--

---

## Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

---

<b>Accreditation scheme</b>	Elmhurst Energy Systems Ltd
